DETAILED ACTION

Allowable Subject Matter

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to the independent claims 1, 2, and 5, prior art fails to disclose or make obvious, in combination with other recited features of the claim limitations, a method and device of generating a supersonic jet expansion, wherein a mixture of a supercritical fluid and a non-volatile sample or a mixture of a supercritical fluid and a pyrolytic sample is jetted into a high vacuum chamber of 10^{-7} Torr or more to generate a supersonic jet expansion of sample molecules in the lowest energy level without intermolecular collisions or molecular aggregates containing the sample molecules.

The key element of the applicant's invention, not disclosed in prior art but present in all the independent claims, is the generation of a supersonic jet expansion, wherein a mixture of a supercritical fluid and a non-volatile sample is jetted into a high vacuum chamber of 10^{-7} Torr or more to generate a supersonic jet expansion of sample molecules in the lowest energy level without intermolecular collisions or molecular aggregates containing the sample molecules.

The dependent claims 3-4 and 6 are allowable by virtue of their dependence upon the independent claims 2 and 5, respectively.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Both A. Amirav (7,247,495 B2) and Yamada et al. (7,038,217 B2) disclose a method and apparatus for generating a molecular beam from a sample solution using a supersonic nozzle.

M.L. Vestal (4,902,891) discloses a thermospray vaporizer for obtaining an ion vapor from a liquid sample separated by chromatography for analysis by a mass spectrometer. Lee et al. (5,070,240) disclose a method and apparatus for analyzing chemical species using a time-of-flight mass spectrometer which receives ions through an ion supersonic jet forming device.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nikita Wells whose telephone number is (571) 272-2484. The examiner can normally be reached on 8:30 AM - 5:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (571) 272-2293. The central fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
